

Wire & Sink EDM

You are looking for a specialist in wire and sink EDM?
YOUR-TOOL GmbH is your Contact!

We work with systems of the newest generation and are capable of drilling with a minimal diameter of 40 µm.

Newest developments in sink & wire EDM are revolutionizing the drilling technologies and shaping undreamt of options in the production:

- Small starting hole drilling - diameter from 0,04 mm
- Production of process intensive small holes
- High surface quality of the drilling surface
- No entry deformation

Wire EDM

Newest developments in the areas of micro-erosion create undreamt perspectives and versatile possibilities in the production of 3D shape inserts, micro-holes and miniature contours.

The process safety and consistent quality of different batch sizes is guaranteed.

Smallest inside corner radius	0,012mm
Smallest wire diameter	0,02mm
Position accuracy	+/- 0,020mm
High surface quality until Ra value	0,001mm
	0,07 mm

Personal consultations are very important to us and we are happy to be in contact with you.
